

J.SANKARLAL

106, Govindappa Naicken St.,
Chennai – 600 001

10th February 2007

I, J.Sankarlal, aged 32 years; wish to state the following;

About 8 months back, all of a sudden, I had a major problem in my sight and I could not see anything properly. I could feel the objects closer to me as a shadow only. I got dejected and lost hope of my future. When contacted a Ophthalmic Surgeon Nearby, he had informed that I would not regain my vision. However, he had referred to another surgeon in a very reputed hospital in the city. After taking scan, the surgeon in the reputed hospital had given me some laser treatment and informed that I might regain the proper vision after 4 or 5 months, which could not be assured. Having worried of the situation, on the advice of my neighbors, I approached Shri.Vipinchandji, who is rendering free service under 'ZERO THERAPHY' i.e. curing of ailments without any medicine. Shri.Vipinchandji informed that he could offer the treatment only if I referred by somebody who had already taken treatment with him and also after attending the meeting which he usually conducts every week. Accordingly, I was referred to Shri.Vipinchandji by Mr.Suresh Kumar Jain of M/s. Nirmal Enterprises and undergone treatment under 'Zero Therapy' offered by Shri.Vipinchandji.

Within a very short period, to my surprise and joy, I had regained more than 90% of vision not only the sight problem, other problems in my body which I was having earlier had also be cured, by the Zero Therapy offered by Shri.Vipinchandji. Before coming to Shri.Vipinchandji, I was very much depressed and lost hope in living. By God's grace, I had the opportunity of undergoing treatment with Shri.Vipinchandji under Zero Therapy and now I have almost re-born. I am very much grateful to Shri.Vipinchandji who regained me the sight and also cured from other problems in my body WITHOUT ANY MEDICINE under ZERO THERAPHY.

FLUORESCEIN ANGIOGRAPHY REPORT

REF:136574/453/JUN/FA/06-07

NAME :Mr.SHANKARLAL
M.R.D.No.136574

FA No.30177/2006

The first run was concentrated on the RIHGT EYE and showed blocked fluorescence and an area of increasing dye leak in the periphery. The media were hazy due to vitreous haemorrhage.

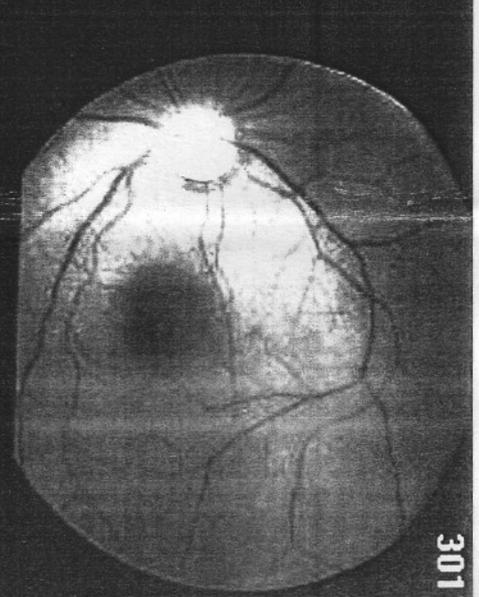

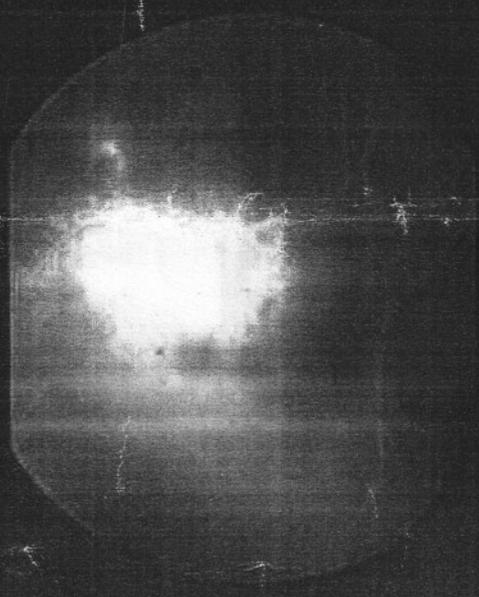

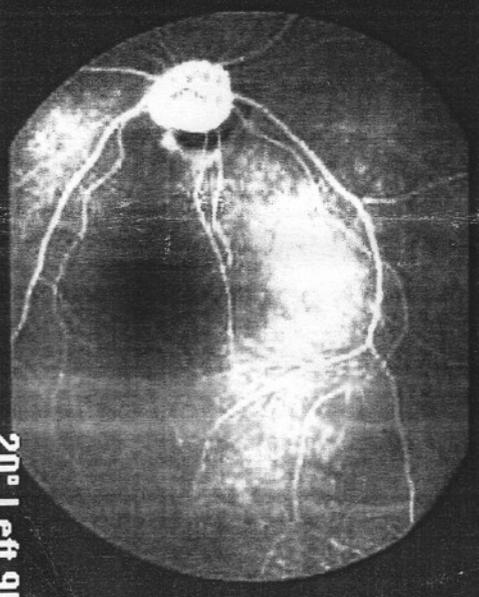

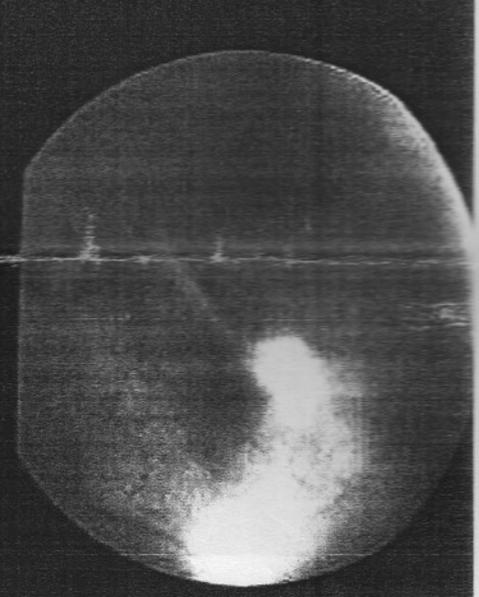

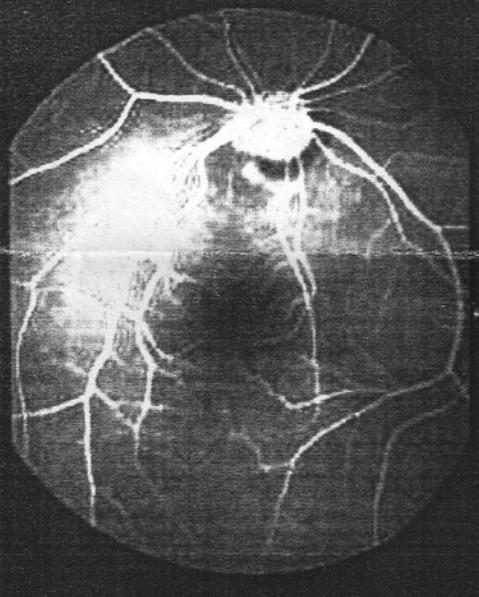

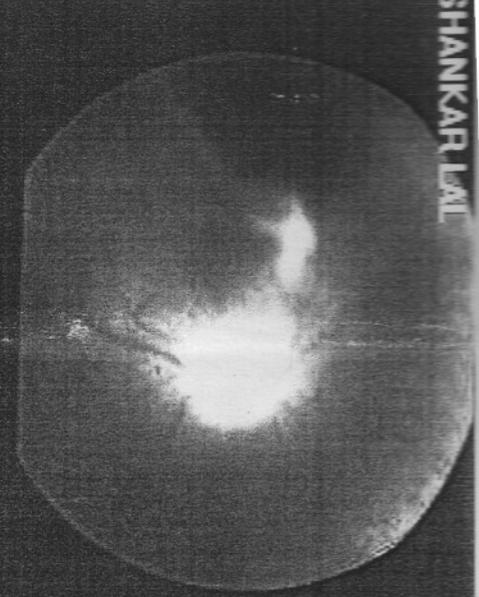

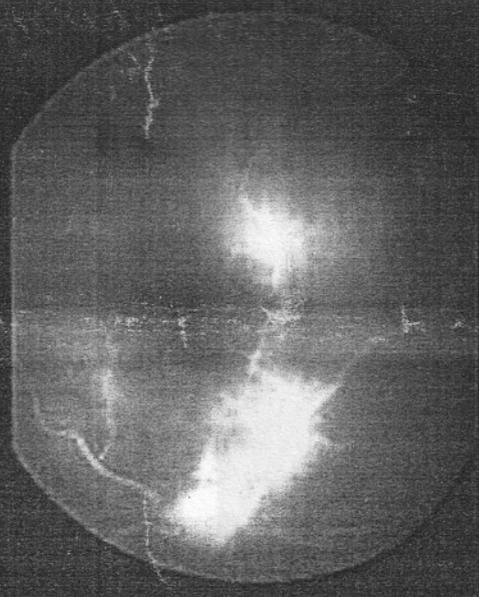

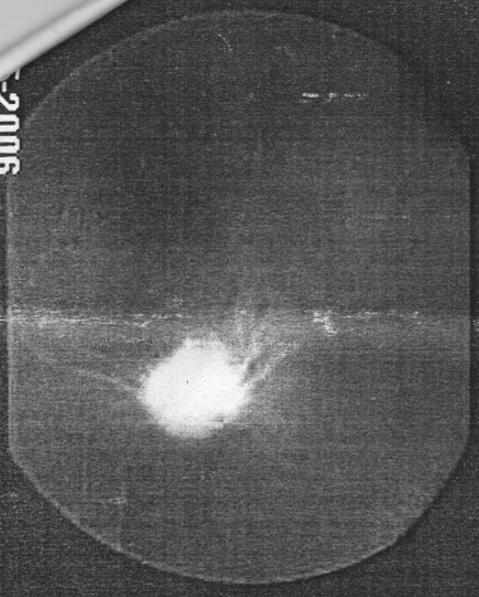

The cross over view showed a normal appearance. .

IMPRESSION: VITREOUS HAEMORRHAGE – RIGHT EYE - ? EALE’S DISEASE.

Dear Dr.M.SOHANRAJ

Ref: Mr.SHANKAR LAL
M.R.D.No. 136574

Thank you for asking us to see the above patient.

Mr.SHANKAR LAL Has undergone LASER COAGULATION where in a TOTAL of 2800 burns were applied using 0.420 watts of power at 0.07 secs. and 200 microns in size to RIGHT EYE.

We have used the YELLOW beam of the laser.

The patient is seeing you for favour of continued followup.

We would like to review him in **six to eight weeks** time, when angiography may have to be repeated.

With Warm personal regards.

Sincerely yours,

Dr.P.JANAKIRAMAN
